

Using public airwaves to preempt regular programming for 1 and 1/2 hours of either anti-Kerry or anti-Bush propaganda is WRONG. Just as our government has checks and balances, then the FCC is the only check on the media. The FCC should forbid the Sinclair Broadcasting Company from showing the anti-Kerry documentary on our public airwaves. If the producers of this anti-Kerry film want to be heard, let them do what Michael Moore did with his propaganda film, release it in movie theaters. But requiring US stations in battleground states to preempt programming to show this film just two weeks before the election is a dirty political trick and the FCC should act immediately against using our public airwaves for it.

Thank you.
